It's a bright new day for Colorforms...! The iconic 60-year-old brand from University Games that has changed the way generations of children have played is making its digital debut with the very first Colorforms app, Colorforms® Revolution™. The new app extends the traditional Colorforms experience, giving players fresh and fun ways to play with sound, motion and animation. Colorforms Revolution is now making a colorful splash on the App Store for iPad, iPhone and iPod touch.

The Colorforms Revolution app by Out of the Blue Digital celebrates the nostalgia of the standout original with brilliant multihued shapes that can be arranged in endless combinations of open-ended play, from a single figure to an intricate on-screen design. Players can choose a shape from their bank of Stick-Ons™ play pieces and place them on the workspace with just a finger tap, scaling their design with a pinch and shaking their device to jumble the shapes for more abstract creations. Budding artists can save their masterpieces and even share them with friends through their favorite social media platforms.

In addition, the app introduces fun shapes with themes including vehicles, animals, people and nature. Players also have the ability to create unique puzzleboard illustration, which, once completed, come alive with animation, sounds and a kaleidoscope of color changes.
